

Cortegra Purchases New Vijuk Large Format Folder for its Evansville, Indiana Facility

New 150 Panel Folder for Larger Packaging Inserts Due to FDA Requirement for Increased Type in Inserts

FAIRFIELD, NJ – Cortegra, a dedicated partner for healthcare packaging solutions, has installed a Vijuk MV Large Format Folder in its Evansville, Indiana facility. This purchase is in response to the FDA requirement for larger font sizes and additional prescribing information (RTA large format) on packaging inserts to manage the risk of medical product use and reduce medication errors.

The increased type size necessitates the need for larger inserts. It's a challenge for many drug companies to meet this requirement without having to make major changes to their existing packaging lines. Cortegra can offer a solution to this problem with its new Vijuk MV Large Format Folder.

The Vijuk Folder can fold inserts up to 150 panels thick, whereas many industry folding machines can only fold 90 to 120 panels. It can fold a flat sheet of up to 20.75 inches wide and can produce folded inserts that are smaller and thicker than other folders. The Vijuk MV Large Format Folder has a folding rate speed at 150% of many other folders and stores job settings for quicker make-readies. It also features an upgraded glue system and a digital water score system.

“The FDA requirement for larger type sizes and more copy on drug packaging inserts presents a real problem for drug companies that have existing packaging lines that will not accommodate a larger folded insert. Therefore, we are especially pleased to announce the addition of our new Vijuk Large Format Folder which offers the state-of-the-art solution for these challenges.” stated Cortegra National Sales Manager, Leslie Love. “This folder enables Cortegra to

offer greater capacity and more folding flexibility than ever before and supplements our combination piece solutions.”

A subsidiary of Menasha Corporation, Cortegra, headquartered in Fairfield, New Jersey, brings single-source excellence to healthcare packaging materials. With more than six decades of pharmaceutical printing experience, the company has become one of the recognized leaders in providing packaging and labeling services to the healthcare market including pharmaceutical, medical device, biotech and diagnostics. Its products include brand authentication technologies, labels, inserts, outserts, folding cartons, flexible packaging and booklets.
